

How to install maps?

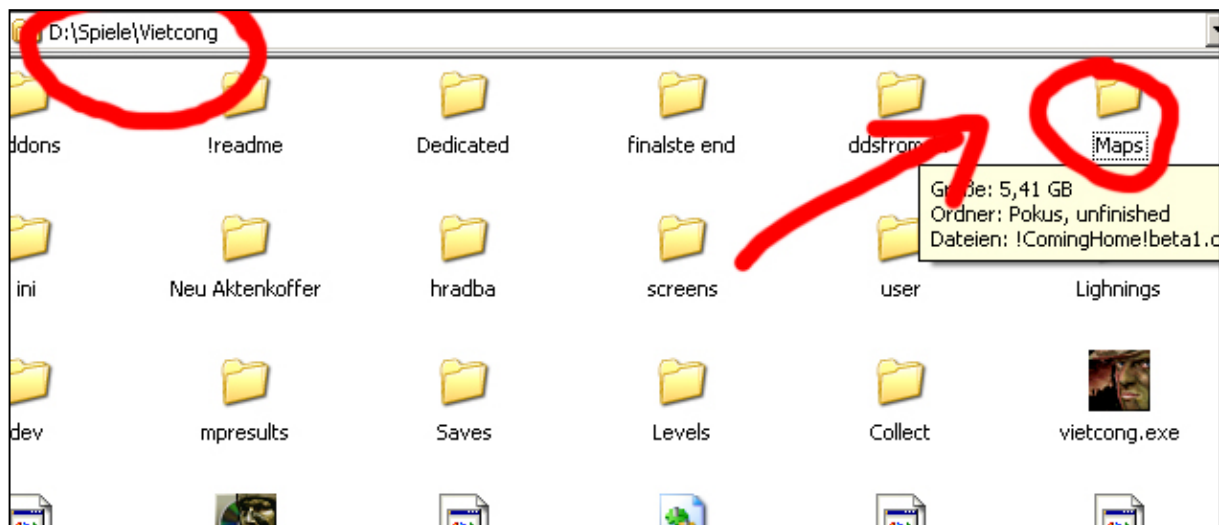

After you downloaded a map from a webpage like www.vietcong-customs.com or other clanpages.

You have to extract the files if they are packed with winrar for example. You will find 2 files [a *.dat and a *.cbf] which you have to copy in your maps folder.

If you dont have a maps folder in your Vietcong main-folder you can easily create one.

Example: D:/Games/Vietcong/maps

Restart the game and have Fun. Some maps need the addon Fist Alpha to be played.
